

# Parking Lots

Asset Management

## Two modes to fit your needs

### Lots Only

This version of StreetSaver is specifically designed for users needing to track only parking lots.

#### Features:

- Dynamically create GIS and Parking Lot data using Bing Maps and the built-in GIS drawing tools.
- Create inventory with Parking Lot Areas derived from GIS.
- Use StreetSaver's powerful analysis and reporting tools.
- Inspections, M&R, Budgeting, Area ID's and Custom fields are all available for tracking condition and inventory.

### Mixed Mode

Maintain your road network and parking lots side by side.

#### Features:

- A more robust GIS map that includes Roads and Lots
  - View your road and Parking Lot inventory and condition side by side.
  - Include Parking Lots in your road network maintenance, budgeting, and reporting.
  - Roads and assets in one simple to use interface.
-
